02 HFMED[®]

Your Ideal Operating Table Supplier

Well Sold For 40 Years Worldwide
Meet The Basic Demands Of General Surgery

Patient-centered and user-friendly as the development basic principles for us, has made Techartmed become one of the leading manufacturers in China. Close cooperation with the hospital and years of experience have resulted in our tries and improvements of our tables.

Engineered for increasingly complex surgical scenes, HFOT100 comes with extreme loads in any position. The modular structure enables it to be adapted to match the size of the patient and in no time at all it can be equipped for any surgical discipline. A longitudinal shift of up to 310mm makes the HFOT100 even more versatile.

HORIZONTAL SLIDING

310mm

Details 04

- 1 / Longitudinal slide up to 310mm for free access to C-arm without repositioning the patient.
- 2 / Extreme weight load capacity of 450 kg with highest safety and stability.
- 3 / Modular design tabletop tailored for various surgical discipline needs.
- 4 / The Easy click new mounting point enables the table adapted to wide variety of surgery and patients' height.
- 5 / Memory pad with antistatic, waterproof design.
- 6 / Standard override panel control makes the control safer.
- 7 / Maximum and minimum heights of the HFEOT100, for comfortable working, both seated and standing.

Modular Design

The modular structure of the table top is tailored for various surgical discipline needs ,which also can low down the cost of the hospital.

Easy Click Connection Design

The easy click connection design offers a convenient ,safe,intuitive modular mounting solution. Different surgery have different requirement of table. The easy click connection make the table easy to adapt to the surgeries.

Double Control System

The table is controlled by using a corded hand remote, in the event of emergency it can also be operated using the override control panel.

All of the essential operating table functions can be controlled by the hand remote and the override panel(e.g. Flex, Reflex, β -position or foot locking). The elevation of the kidney bridge is controlled by manual handle.
